Attn: Larry Frost

Dear Larry:

Enclosed is a revised drawing of our facility showing the three additions we have made since the permit was issued. These changes are 1) installation of a 12' wide overhead door to the loading dock area, 2) installation of a 10' x 12' plant office/breakroom and 3) installation of a 10' x 14' cooler.

In addition to the above we have replaced the entire electric service with updated 480/3/60, 1200 amp to better supply the plant and replaced the fluorescent lighting with high bay lights.

I will continue to keep you updated on any changes and revisions we make to the plant as it pertains to our permit.

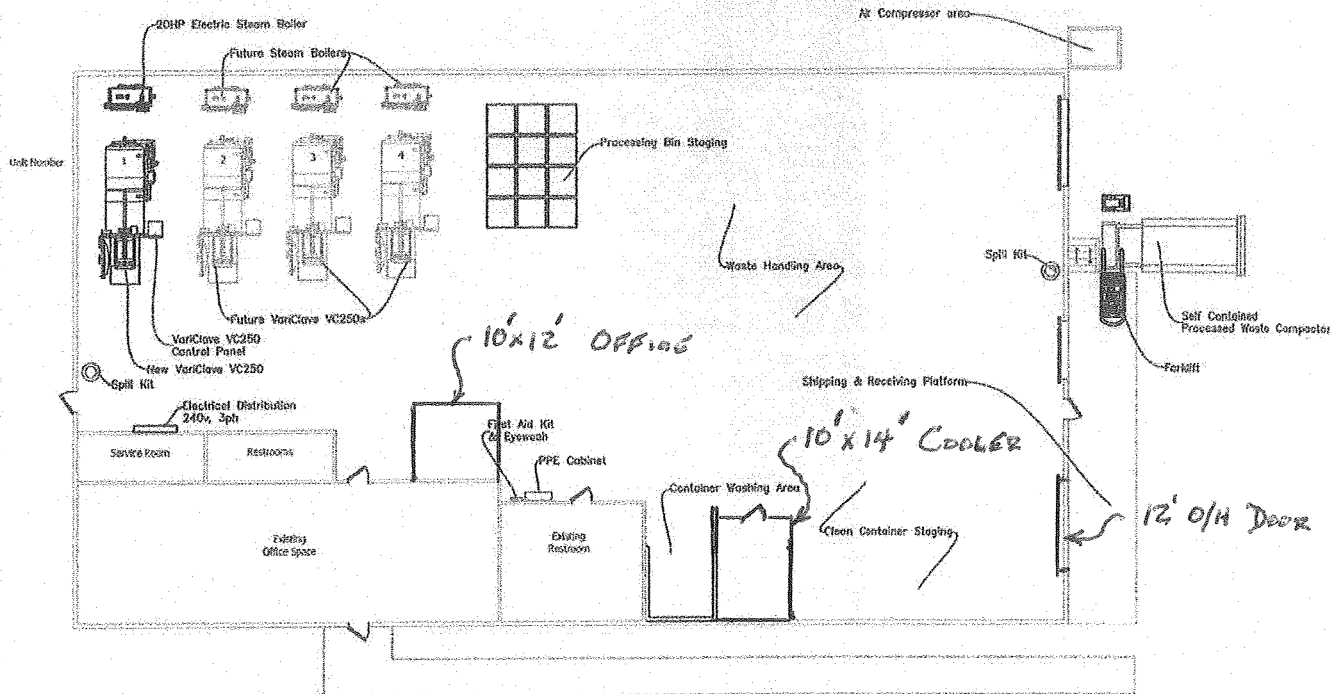

Thank you for your continued assistance.

Sincerely,

Gerry Moore, Plant Manager

"Providing Medical Waste Treatment for the 21<sup>st</sup> Century"

### Projected Annual Processing Capacity
